

# International Symposium on Applied Analysis in Honour of the 65th Birthday of Michel Chipot and his retirement

June 10–11, 2014, room: Y27H12

Organizers: B. Brighi, A. Rougirel, S. Sauter

## Aim and Main Topics

This conference brings together scientists working in the broad field of Applied Analysis.

The main topics are:

- » Elliptic and Parabolic PDEs
- » Free Boundary Problems
- » Fluid Mechanics
- » Evolution Problems
- » Calculus of Variations
- » Homogenization
